From the Clubhouse

From the Desk of Jesse K. Thorpe, General Manager

Dear Members,

Now that the project is pretty much finished, I thought it a good time to talk about money. We did finish the work originally planned within the \$6.8 M budget. As part of the project we added a few items that weren't part of the original scope as part of the plan. These include painting the exterior of the entire building a new color, adding a new generator to power refrigeration during an outage, using propane to fuel it, new wiring for all computer connections and the wine lockers.

Big picture we spent \$684K on plans, permits and insurance. Another \$410K on furnishings, \$132K on fitness equipment, \$84K on Audio/Visual \$173K on kitchen and bar equipment and the balance (\$5,317K) on construction, decor features, paint, plaster, etc.

In addition to these upgrades we expended roughly \$40,000 on legal; and closing fees and \$26,000 expanding our water and sewer capacity with the DCDD, and set ourselves for the future (something we would have had to do regardless of the project as we were exceeding our allotments prior to the project).

This was a tremendous effort, aided strongly by Club member Rick Bodge, our Superintendent Shaun Helmer, and our management team.

In the end, it has all worked out well. By the way, food sales in May at the Links were up 48% over last year- thanks for using the club!!

FROM THE KITCHEN

I have been asked by members in the past: "What exactly is Hominy?" ...hominy is made from corn kernels that have been treated by soaking the mature grain in a dilute solution of lye, slaked lime or wood ash - which are all high in alkaline. This process is referred to as nixtamalization. The corrosive nature of the solution loosens the hulls from the kernels, softens the corn (doubling it almost twice the size when cooking), and kills/ removes the "germ" which keeps it from sprouting during storage. Nixtamalization (the process) also reduces or eliminates the potential risk of "Pellagra" (consuming untreated corn resulting in a niacin deficiency (vitamin B3)). Hominy is used as a side dish, part of a casserole or dried and ground into grits - fine, medium or coarse grinds. Try it in a classical Pozole (Latin American Soup with chicken or pork) or in this quick side dish recipe:

Fiesta Hominy

2 cans (15.5 ounce each) - hominy, white; drained and rinsed *or cook your own dried hominy; like you would dried beans
2 tablespoons - butter, unsalted
1/2 cup - white onions, chopped
1/3 cup - red bell peppers, chopped
1/3 cup - yellow bell peppers, chopped
2 each - jalapeno peppers, minced
1/2 teaspoon - garlic, minced
4 ounces - tasso ham, small dice
1 teaspoons - chili powder
1/3 teaspoon - paprika to taste
to taste - kosher salt
to taste - pure ground peppercorns

In a saucepan, over low heat, sweat onions, peppers and garlic in butter until tender. Increase to medium heat, add remaining ingredients and cook uncovered for 5-10 minutes or until heated through, stir occasionally. Yield: 6 servings. Enjoy!

News from the Golf Shop..

Hope that you are having a great summer on the courses.

We will be holding the annual Independence Day Tournament on Sunday June 30. The event will be a 1 p.m. shotgun on the Links Course. You can create your own foursome or let the golf shop pair you. Sign up today by calling the Golf Shop at 446-6222.

Our hosting of the 73rd Florida Open Championship is just around the corner. The event will take place July 12 - 14. The event will be comprised of 156 players from about 1,000 qualifiers from every corner of the Sunshine State. The first two days of the event will be played on the Links and the Creek Courses with the final day being contested at the Creek Course. The tee times for the event are morning times and they are in a crossover format. We would expect the course to open for member play at 2 p.m.

We are still looking for volunteers to help in our effort to make Hammock Dunes shine. If you are interested and you see Phil O'Connor or Bob Malin, you can let them know or contact Ron Sharpe at rsharpe@hammockdunesclub.com.

Summer is always a great time to break down your swing and to make big improvements. As always, don't struggle with your game. All our pros are willing and able to help you.

We hope to see you on the course soon.
Thank you.

Brad Myers, PGA, CCM - Director of Golf

"If you're caught on a Golf Course during a storm and you are afraid of lightning; simply hold up a 1-Iron. Not even GOD can hit a 1-Iron" -Lee Trevino

The summer is HERE for sure!

We wish all our "snowbirds" safe travels to their destinations. You all will be truly missed!

The 2019-2020 season will be here before you know it. We welcome our new president, Kimmie Wise. Kimmie has her work cut out for her because Stephanie Susetka was an amazing HDLGA president. Kimmie has put together a fantastic board and our tournaments have great chairpersons. The new HDLGA Board had our first meeting on June 12. Everyone is super excited to work together to make the next HDLGA golf year even BETTER than last year. Your HDLGA board is always available for any questions, concerns or even suggestions that you may have; feel free to contact us, anytime.

Remember, Wednesday Ladies Golf continues all summer on our spectacular golf courses. Tee times begin at 8:30 a.m. Ladies Day Golf sign-ups will be through Golf Genius or by calling the golf shop by 2 p.m. on Tuesdays.

We are so fortunate to have such a fantastic Golf Staff. We should all take advantage of the light summer attendance and work on our golf game for the upcoming scheduled events.

Summertime golf requirements: lots of water, cool towels and SPF (fewer swings certainly helps also!).

Hope to see all you ladies on Wednesdays.

On the Courts

Pros Corner..

The Serve and Overhand Smash

The serve and overhead are two of the most (8112) enjoyable shots to hit in tennis. These shots are fun to hit hard but trying to do so can cause many problems (lack of control, poor timing, loss of balance) and actually cause the shots to lack pace.

Both of these shots require a similar swing and are the only shots in tennis that are executed with a "loose" wrist. In order to hit these shots effectively, players need to concentrate on keeping a relaxed wrist and reaching up to the ball. To emphasize these two critical fundamentals, try to "HIGH FIVE" the ball with your racquet head at the top of your swing. This visual exercise will help you to make contact with the ball at the proper height and alleviate the tendency to "muscle" it.

Try to "HIGH FIVE" the ball on your serve and overhead and you'll soon be celebrating a lot more success on the court!

Opera at Hammock Dunes

July 25 ➤ from 4 - 6:30 p.m.

Donizetti's Don Pasquale

Don Pasquale has always been considered a masterpiece of comic opera, and "this sparkling recording... triumphantly explains its continuing popularity," according to *The Telegraph*. There is conniving and slapstick aplenty, but also great subtlety and lyricism. Director Mariame Clément finds the sweet spot between the two. The performance was filmed live at the Glyndebourne Opera House on August 6, 2013, and stars Alessandro Corbelli and Danielle de Niese.

All are welcome. The program will begin promptly at 4 p.m. in the Boardroom, and there will be an intermission. Please remember to arrive early and enjoy a glass of wine or champagne before.

Presented by Jinny Crum-Jones and Ian Jones
(www.dunesopera.com)
in association with Barbara Arzonetti

As always, after the final curtain and applause quiets down, please consider staying for dinner.

Audubon Corner...

The Green Tree frog is pleasing to look at and very beneficial for our gardens and yards. Its diet is mostly beetles, crickets, caterpillars, beetle larvae, stinkbugs and other small invertebrates. Large toe pads allow it to stick to windows, walls and trees while hunting for food. Sometimes called the Cow-bell frog as its call sounds like a cow bell.

Look for the distinctive white strip that runs down both of its sides. This frog breeds March to October and lays large batches of eggs. In one night, 300-1,000 eggs can be laid in vegetation around fairly deep permanent ponds or in standing water such as in bromeliads, rain gutters or tree hollows.

The invasion of the non-native Cuban Tree Frog has greatly harmed the number of the local Florida Green Tree frogs. I took this picture in a local garden.
